## THIS IS VITAL.

The moult or shedding of their old and often weather-beaten feathers to be replaced by an entirely new suit is probably the severest strain to which bird life is exposed and produces a greater mortality than any other cause.

You should be extremely careful that their food is right and that your bird has a good tonic to tide him over this period. We have tonics, seed, bitters, sand and molting bird food. This is a subject every bird fancier ought to investigate.

## STRENGTH IN OUR MEDICINES

for you; unless you are a Sallow. If you are going to take tonics, don't forget that now is the time of all times of the year to take them.

Take our advice first and our medicine afterwards. Then you'll feel like a man—a 100 percent being—not half right and half wrong. If you're worse off, better get the doctor and get a prescription and have us put it up.

On the contrary, if you're up to about 98 percent, a glass of our soda is all you need to gain your two points.
